

Overview

Activating and Installing IntellaPhone

1) Check the email the registration was sent to. You'll have a setup link similar to the one below.

 and or type unknown

2) The provisioning web page will look similar to this but with your own password.

 and or type unknown

3) Click **Download SoftPhone** and then run it. You'll get this message below.

4) Click **More info**, since that's the only way to access the **Run Anyway** button.

 and or type unknown

5) Click the **Run Anyway** button

 and or type unknown

6) Go through the default install process by pressing **OK**.

 and or type unknown

7) If your company has a branded version of IntellaPhone, it will have your company name as part of the welcome.

8) Click **Next**.

 and or type unknown

9) If your company has a branded version, the **Start Menu Folder** will automatically include the name of your company.

10) Click **Install**.
