

Tenants Module

The **Tenants** module is where **Users** first start when adding a fresh phone system for an organization. A **Tenant** is a phone system which essentially means a collection of phones. For a single organization, in most cases you will fall under a single **Tenant**, however, a re-seller of the IntellaSoft platform may be required to maintain multiple organizations' phone systems, thus the need for having the ability to manage various **Tenants** within a singular web portal account.

How to Navigate to the Tenants Module

image.png and or type unknown

Adding a New Tenant

- 1) Start by navigating to the Tenants Module via the **Navigation Panel**.
- 2) Click the button labeled **New Tenant**, two forms will appear labeled **Tenant Name** and **Long Name**.

image.png and or type unknown

- 3) Enter the **Tenant Name**.

Remember that the **Tenant Name** cannot contain spaces, if you wish to include a space in-between words, do so with an underscore. Enter a relevant **Long Name**, the long name serves as a descriptive name and can contain spaces.

- 4) After you are satisfied with your selection, select **Save New Tenant**, or **Cancel** if you do not want to save. After you have saved, you will see a message stating **Changes Saved**.

Removing a Tenant

Due to the critical nature of the **Tenant** editor, for security reasons, we do not currently allow **Users** to delete any **Tenants** from the **Tenant** editor. Doing so can potentially have disastrous effects on a live system. Please contact your **System Administrator** to discuss removing a **Tenant**.
